SealIQ

The AI credit management platform

SealIQ shows how likely each customer and supplier is to pay, and what you can do about it. It brings bank data, your ERP and CRM, annual accounts and press together in one risk picture for each counterparty. Credit managers, CFOs, sales teams and procurement use it to decide on payment terms, deposits and credit insurance, and to see a change before the first late payment.

Key drivers
What pushes the risk up or down, with the impact of each driver.

Non-payment risk
One percentage for the next 12 months, from 10,000+ simulations.

Recommended action
A proposal for the order that you accept or change.

HOW YOU START

1. **Connect**
We build a dedicated connection to your ERP and CRM.

2. **Invite**
Your counterparty takes part in the credit assessment and decides what it shares.

3. **Decide**
SealIQ calculates the risk and ranks the terms you can offer for the order.

4. **Follow**
You hear when the risk of a counterparty changes, and why.
